Dear Dr. Summerson:

1 Thank you for sending me a copy of the Supplement to the Draft Environmental Impact Statement (EIS) for a Geologic Repository for the Deposit of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada, for review. The information exhibited in this supplement is overwhelming but quite understandable. The presentation of this material is excellent. My compliments to the staff who worked so diligently to prepare this document in such a concise manner. I know that this was not an easy task.

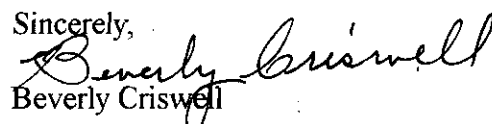

As like most Americans, I am concerned about the pollution of the environment. I think that we all aspire for a world with clean air, clean water and no pollution. We all, in our own way, do our part to obtain this goal. I personally live by the creed to **"Leave The Planet Better Than I Found It."** So, I am always on the look out to find new technologies or products that will make the planet a little more environmentally friendly.

2... There is a technology that I am aware of that might conform with your goals at the Yucca Mountain Project. Since I am not a scientist and have limited knowledge of this technology, I must refer you to its inventor. My recommendation for your project is to contact:

Dr. Louis Circeo
Principal Research Scientist
Georgia Tech Research Institute
151 6th Street
Atlanta, Georgia 30332
e-mail: lou.circeo@gtri.gatech.edu
Phone: (404) 894-2070
Fax: (404) 894-2184

2 cont Dr. Circeo has developed technology and has developed a plan for Nuclear Waste Disposal that will interest you very much. Please take the time to contact this man. It will be worth your effort.

Thank you for letting me participate in this review process.

Sincerely,

Beverly Criswell
